Disclaimer

Note

KSV1870's economic information is compiled with the utmost care and in line with relevant economic developments. However, KSV1870 recommends that KSV1870 information, including the KSV1870 rating, monitoring reports, and recommendations, should always be used for business decisions in conjunction with daily developments that we are unable to record in detail.

KSV1870 Rating

Using its unique database, and backed by over 155 years of experience as an association for the protection of creditors, KSV 1870 has successfully been developing quality, reliable measurement methods and ratings for the forward-looking assessment of personal and corporate credit worthiness. Depending on the data available, various statistical models can be applied.

CompanyScore model: This model can be used when researched data is available. Time series track the developments; depending on the legal form of the company, balance sheet data may be available. Information on the payment track record, debt collection data, etc. are likewise taken into account and assessments by the information experts are given particular attention.

StartupScore model: This model is used when the company is less than 12 months old and no extensive data is available yet. General information on the persons of economic relevance in the company as well as the line of business, legal form, etc.

BasicScore model: This model is used when basic data on the corporate structure is available; data updates are continuously fed into the business database. If available, debt collection cases, bankruptcies and current balance sheet are taken into account.

Rating class	000	100-199	200-299	300-399	400-499	500-599	600-699	700
Risk	no current calculation	minimal risk	very modest risk	modest risk	increased risk	high risk	very high risk	insolvency indicators
Probability of insolvency		from 0.01 % up	from 0.04 % up	from 0.27 % up	from 1.73 % up	from 10.38 % up	from 43.26 % up	
Explanation (company score) basic score and new starter score)	probability of default is not calculable	a default is not probable	very modest probability of default	default probability of default	above-average probability of default	high probability of default	very high probability of default	

Note about scoring

The score value (KSV1870 Rating, RiskIndicator or KKE-Score) possibly contained in this information cannot be used as the sole decision-making factor, but supports you in your risk assessment. The final decision on a business relationship therefore lies exclusively with the authorized recipient of this KSV1870 information. Any other use of the contents of this information is excluded.

Data sources

The data is automatically processed on the day it becomes available; furthermore, information experts carries out research across Austria. On a case by case basis, the following sources are used as required.

Ongoing or automated processing:

- Company Register and business license data
- balance sheet data
- data collection data
- insolvency information
- report monitoring
- and lots more

Manual or ad-hoc processing:

- the company's self-disclosure
- reference information from suppliers and business partners
- bank information pursuant to sec. 38(2)(6)
- land register data
- and lots more

- etc.

Last revision: On this date the KSV1870 has last checked the respective company. Irrespective of this date, KSV1870 insolvencies, KSV1870 debt collection data and changes in the companies' house are updated on a daily basis.

WebRisk Indicator

The WebRisk Indicator measures IT security of a company's website but does not guarantee any specific assurance on an organisational level. This indicator is designed as a selection tool for CyberRisk Rating candidates within a given supplier base. It is recognised as a first step towards demonstration of compliance with the NIS act (NISG) and related regulations.

A blue WebRisk Indicator means that no signs of elevated IT security risks were identified within the assessment criteria listed below. A purple or red WebRisk Indicator means that one or multiple assessment criteria have not been met. In this case, an in-depth analysis of the company using a full-scale CyberRisk Rating is recommended.

Neither KSV1870 Information GmbH nor KSV1870 Nimbusec GmbH accept liability for IT security incidents and any damage that may occur as a result of entering into business relations with a company that has undergone an assessment.

	No rating	Excellent	Moderate	Infected
Risk		Low risk	Moderate risk	High risk
Description	No website available.	The website complies with security standards	The website does not reflect full compliance with security standards.	The website is infected with malware.

Assessment criteria:

- Indicators of IT security incidents
 - Malware distribution
 - Defacements
- Indicators of encryption quality
 - SSL cipher suite
 - SSL validity
 - SSL host name
 - SSL trust level
- Effective use of incident mitigation tools
 - Security header implementation
- Indicators of domain reputation
 - Blacklisting of own domains
 - Blacklisting of third-party domains that own domains link to

N.B.: The WebRisk Indicator does not impact the KSV1870 Rating.

CyberRisk Rating: If you plan to grant this company access to your IT systems or digital data, we recommend an in-depth analysis using a CyberRisk Rating. Learn more at: www.cyberrisk-rating.at/beantragen
