WebRisk Indicator

The WebRisk Indicator measures IT security of a company's website but does not guarantee any specific assurance on an organisational level. This indicator is designed as a selection tool for CyberRisk Rating candidates within a given supplier base. It is recognised as a first step towards demonstration of compliance with the NIS act (NISG) and related regulations.

A blue WebRisk Indicator means that no signs of elevated IT security risks were identified within the assessment criteria listed below. A purple or red WebRisk Indicator means that one or multiple assessment criteria have not been met. In this case, an in-depth analysis of the company using a full-scale CyberRisk Rating is recommended.

Neither KSV1870 Information GmbH nor KSV1870 Nimbusec GmbH accept liability for IT security incidents and any damage that may occur as a result of entering into business relations with a company that has undergone an assessment.

	No rating	Excellent	Moderate	Infected
Risk		Low risk	Moderate risk	High risk
Description	No website available.	The website complies with security standards	The website does not reflect full compliance with security standards.	The website is infected with malware.
